

COMPOST BUYING GUIDE

Reduced Peat and Peat-Free Products

This buying guide is designed to help you make an informed choice when buying compost. It lists the various reduced peat and peat-free composts that are now becoming increasingly available from garden centres and DIY stores, together with contact details if you need to find your nearest stockist.

By choosing reduced peat or peat-free composts, which contain recycled materials, you will benefit the environment and help to reduce the amount of garden waste that is sent to landfill.
